Professional Summary

B.Tech Information Technology graduate with practical experience in Python, SQL, Pandas, NumPy, data cleaning, web scraping, ETL concepts, and data pipelines. Experienced in developing automated data collection solutions, transforming raw data into structured datasets, and building web applications using React.js and Firebase. Strong foundation in data analysis, database concepts, programming, and problem-solving, with hands-on project and internship experience.

Education

KSR Institute for Engineering and Technology, Tiruchengode <i>UG - B.Tech in Information Technology</i>	2021 – 2025 74%
Govt. Higher Secondary School, Lakkapuram <i>Higher Secondary School</i>	2020 – 2021 87.50%
Govt. Higher Secondary School, Lakkapuram <i>Secondary School</i>	2018 – 2019 83.20%

Technical Skills

Programming Languages: Java, JavaScript, Python

Data Analytics: Numpy, Pandas, Data Cleaning, Data Analysis

Data Engineering: Data Pipelines, Data Warehousing Basics, ETL Concepts

Front-End: HTML5, CSS3, Reactjs

Backend and Database: SQL, Firebase

Tools: Git, GitHub, VS Code, Cursor, Figma, Canva, Netlify

Design: Adobe Photoshop, Adobe Illustrator

Internships

Cognifyz Technologies Pvt Ltd <i>Frontend Development Intern</i>	Apr 2024 – May 2024 <i>Duration: 1 Month</i>
Implemented tasks like form styling and validation, and integrated APIs to fetch data from back-end using HTML5, CSS3, and JavaScript.	
Weblogix Technologies <i>WebScraper</i>	Jun 2025 - Aug 2025 <i>Duration: 2 Months</i>
- Developed and maintained web scraping solutions using Python to extract, clean, and organize data from multiple websites. - Automated data collection workflows, ensuring data accuracy and delivering structured datasets for business requirements.	

Projects

Sneakify

- Technologies Used:** React.js, Firebase Authentication, Cloud Firestore, Firebase Realtime Database, GitHub
- Developed a modern **e-commerce platform** for footwear using React.js with dynamic **product catalog, search, filtering, shopping cart, and wishlist** functionality. Built reusable React components and implemented state management to deliver a responsive, scalable, and user-friendly shopping experience across devices.
- Integrated Firebase Authentication with **Email/Password and Google OAuth**, enabling secure user registration, login, and session management. Implemented real-time data synchronization using Firebase Firestore and Realtime Database for products, user profiles, cart management, and order processing. Utilized **GitHub for version control and followed SDLC best practices**, including UI design, frontend development, testing, deployment, and maintenance.

Speech Emotion Recognition System Using Recurrent Neural Networks(RNN)

- **Technologies Used:** Artificial Intelligence (AI), Deep Learning, Python, HTML5, CSS3, JavaScript, Django, GitHub
- Developed an RNN-based Speech Emotion Recognition System with 96.96% accuracy, **3.03% higher** than CNN, collaborating on UI and AI model development & Built a Web Interface using HTML5, CSS3, and JavaScript for **real-time predictions with scalable and efficient deployment Following Agile Development Methodologies, Participated in Code Reviews & Development Process in Collaboration with a Team in Cross Functions such as Designing, Development.**
- Contributed to the project across all the phases of **SDLC Methodologies, maintained documentation providing end to end technical support for users**, presented and published a research paper entitled "**An Enhanced Speech Emotion Recognition System using RNN Compared with CNN**", at Nandha College of Engineering, Erode in ICICCS Conference and stored in GitHub

Weather Monitoring System using IOT

- **Technologies Used: Internet Of Things(IOT), Raspberry PI, Arduino UNO/Nano/MEGA**
- Built an IoT-based weather monitoring system using Arduino. This project measures real-time temperature and humidity, sending data wirelessly for easy remote access and analysis of environmental conditions.

Certifications

- Pandas and NumPy in Practice - Course Labz
- Front End Development(HTML) - Great Learning
- AWS S3 Basics - Coursera
- Python - DigiLabs
- Reactjs - Scaler
- Java (Basic) - HackerRank
- CSS (Basic) - HackerRank
- JavaScript (Basic) - HackerRank
- SQL (Basic) - HackerRank
- Problem Solving (Basic) - HackerRank

Achievements & Co-Curricular

- Workshop: Participated in a Two-Day workshop on Cybersecurity & Ethical Hacking conducted by the National Information and Cybersecurity Council (NICC) at KSR Institute for Engineering and Technology, Tiruchengode on 25th and 26th July 2023.
- Participated in Code Olympia, a National Level Coding Event in ABLAZE 2023 at KSR College of Engineering, Tiruchengode on 13th October 2023.

Area of Interest

- Web Development.
- UI & UX.
- Data Engineering
